EDUCATION

Frontend development

I studied frontend development at MMSIT, and I'm currently studying PHP and Laravel for backend development.

AI with Python

I studied Python for AI and introduction to AI at Simbolo, and I got experience developing computer vision projects.

Computer Science (Present)

I have been studying bachelor's of computer science at UoPeople since September 2023.

EXPERIENCE

QA/QC intern (Remote)

Feb 2023- May 2023

- Remote QA/QC analyst in the technological department
- Analyzed chatbot functionality and fixed errors using Python

Practical Projects

I have been building some group projects with my friends to develop practice skills for developing UI since December 2023. We use Github for development collaboration, with a main focus on UI with Tailwind and related component libraries. For UX performance, routing, and content management, please check my github repository as mentioned below.

Projects include:

- Dashboard Theme
<https://dashboard-theme-lemon.vercel.app/>
- Hotel booking Themes
<https://grandium.vercel.app/>
<https://silly-starburst-bb5582.netlify.app/>
- <https://github.com/kukulauren/project>

SKILLS

- Team collaboration
- Learning Agility
- Attention to Detail
- Time Management
